Summary

Software Engineering student (B.Tech IT, 2022–2026) with strong foundations in Java, C++, Data Structures & Algorithms, Full-Stack Web Development, AI/ML, and Cybersecurity. Solved 100+ coding problems and built multiple production-ready applications including AI-based systems, cybersecurity tools, and scalable web platforms. Experienced through internships with Infosys Springboard, Csharptek, and C-DAC Noida.

Skills

- **Programming Languages:** C, Java, Python, JavaScript, CSS, HTML
- **Frameworks & Libraries:** React.js, Angular, Vue.js, Node.js, Express.js, FastAPI, Flask, Streamlit, Tailwind CSS, TensorFlow
- **Tools & Technologies:** Git, Firebase, Figma, PostgreSQL, MySQL, REST APIs, Agile Methodology, AWS
- **Core Competencies:** Data Structures & Algorithms, Machine Learning, AI, API Development, Database Optimization, Full-Stack Web Development, Frontend Development, Cloud Computing (AWS), OOPs, API Integration, Secure Authentication, System Design Basics
- **Soft Skills:** Leadership, Teamwork, Analytical Thinking, Communication, Time Management
- **Coding Profiles:** LeetCode – Solved 100+ problems focused on DSA
  GeeksforGeeks – Active coding practice and problem solving

Education

- **B. Tech, IT (Nov 2022 - June 2026) -- CGPA: 8.26**
  UCET, VBU, Hazaribagh, Jharkhand
- **Intermediate (2020 - 2022) -- PERCENTAGE: 90**
  SSSSS Gurukulam, Dhanbad, Jharkhand
- **Matriculation (2014 - 2020) -- PERCENTAGE: 93**
  Saint Thomas School, Godda, Jharkhand

Achievements

- Student Coordinator – Training and Placement Cell
- HDFC Badhte Kadam Scholarship recipient
- Coordinator for IT Department extracurricular activities and student engagement programs
- Selected for Accenture GEMS Mentorship Program
- Winner of multiple elocution and communication competitions

Certifications

- Introduction to Cybersecurity – Cisco Networking Academy
- Certified in Cybersecurity (CC) – ISC2
- Generative AI Mastermind Certificate – Outskill
- Cybersecurity Job Simulation – Mastercard, Telstra
- Solutions Architecture Job Simulation – AWS
- Software Engineering Job Simulation – JPMorgan Chase & Co.
- Cybersecurity Analyst Job Simulation – TCS
- GenAI Powered Data Analytics Job Simulation – TCS
- Labmentix Common Aptitude Test (LCAT) – Labmentix
- IP Awareness/Training Program – NIPAM

Projects

- Password Fortress – Credential Security Analysis System
- Built a password security evaluation tool based on OWASP authentication standards
- Implemented entropy analysis, salted hashing, and crack-time estimation
- Designed secure user interface features for credential strength visualization
- **Project Link:** https://password-fortress-flax.vercel.app/

- StreetBase – AI Real Estate Valuation System
- Developed machine learning model for property price prediction
- Built full-stack system using Python, Streamlit, Firebase, and APIs
- Implemented data preprocessing, feature engineering, and model optimization
- **Project Link:** https://streetbase-app.streamlit.app/

- DronAI – Educational Platform Website
- Designed UI/UX prototypes in Figma and developed a responsive educational platform using React and Tailwind CSS for AI and robotics course enrollment.
- Built structured sections including course listings, enrollment interface, and informational pages, improving user navigation and engagement.
- Implemented responsive design and reusable components, enhancing scalability and maintaining consistent user experience across devices.
- **Project Link:** https://dron-ai-lyart.vercel.app/

- ReconCraft – E-Commerce Website
- Developed a responsive e-commerce frontend for a home-construction brand using React and Tailwind CSS.
- Built sections like service showcase, portfolio, and contact pages to improve online presence and usability.
- Implemented component-based and responsive design for smooth performance across devices.
- **Project Link:** https://reconcraft-six.vercel.app/

Internships / Work Experience

- Cybersecurity Project Trainee (C-DAC)
CyberGyan (Jun 2025 - Jul 2025)
- Performed hands-on labs on Nmap, Wireshark, Google Dorks, and network analysis
- Studied cybersecurity fundamentals including network security, ethical hacking, and digital forensics

- Software Development Intern
Csharptek (Jun 2025 - Jul 2025)
- Developed and improved web applications using React and Tailwind CSS
- Integrated APIs and optimized existing frontend components
- Collaborated with senior developers to debug and improve application performance

- AI Intern, Emerging Technologies (AI & Cloud)
Infosys Springboard (Oct 2025 - Dec 2025)
- Developed AI-based real estate valuation system for automated property price prediction
- Built full-stack ML application using Python, Streamlit, Firebase, and APIs
- Performed data preprocessing, feature engineering, and model evaluation

- Accenture GEMS Program
Accenture (Aug 2024 - Mar 2025)
- Selected for Accenture's national mentorship program for women engineers focused on technical and professional development.
- Strengthened Java programming skills through IAspire platform (coding exercises, quizzes, modules).
- Attended SME sessions and mentorship meetings, gaining insights into software engineering practices.
